

Geany As A PCD Editor

I am creating a [Dita::PCD](#) using [Geany](#) as my [IDE](#). On my first attempt I entered an incorrect [PCD Language](#) command. As you can see in the following image the command in question is underlined in red. The message window indicates the reason why. The command is not one of the known valid commands in [PCD Language](#)!

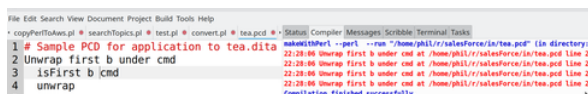

```
File Edit Search View Document Project Build Tools Help
+ copyPerlToDesk.pl # searchTopics.pl # test.pl # convert.pl # tea.pcd #
# Sample PCD for application to tea.dita
1 # Sample PCD for application to tea.dita
2 Unwrap first b under cmd
3 isFirst_b_cmd
4 unwrap
5

```

I have corrected the command and pushed F9 to execute it, as the following image shows, the [Dita::PCD](#) made 4

changes to the [Dita](#) files held in the same folder.
